Brilliant Colours

We have a range of 12 designer colours available in a gloss or frosted matte finish. We are also able to colour coordinate to your requirements if you have a large project with specific colour needs.

Sheet Sizes - 3600mm

3600 x 600 x 6mm

3600 x 300 x 6mm

Sheet Sizes - 3050mm

3050 x 1200 x 6mm

3050 x 600 x 6mm

3050 x 300 x 6mm

Other Size

1510 x 1220 x 6mm

1000 x 1220 x 6mm

Heat Resistant Upstands

900 x 200 x 6mm

600 x 200 x 6mm

Metallic Colours

Nickel Pearl

Domino

Brunetti Metallic

Stirling Silver

White Pearl

Solid Colours

Jet

Magnolia

Green Mist

Olive Grove

Flamingo

Sunset

Jewel

Note: Colour variation between batches can occur.

What is Akрил?

Akрил is an environmentally friendly, highly engineered polymer, enhanced with colour. Quite simply, it offers a new source of design inspiration for kitchens, bathrooms and laundries. Being half the weight of glass and 25 times more impact resistant, Akрил is the logical alternative to glass and provides a safe environment for families, knowing Akрил will not shatter when hit with force.

Environmentally-friendly, Akрил comes in a designer range of colours and finishes and is at home in virtually any vertical situation.

You can let your imagination loose in showers, bathrooms and kitchens. Visualise it as cabinet and wardrobe doors. Think commercial fit-outs and shop-fitting, as wall cladding and feature walls. Akрил is resistant to abrasion and easily repairable.

All these qualities combine to give your creativity unparalleled scope.

It performs equally as well onsite too. It's available off-the-shelf, which cuts lead times and there are no special tools required to work with it. Akрил is light weight, comes with a 10-year UV warranty and is very affordable.

The Akril Solution

Akril is a highly engineered polymer, enhanced with colour, that offers a new source of design inspiration.

This durable panel was originally developed as a cost effective alternative to painted glass – but its qualities of versatility, flexibility and workability allow it to stand alone in a range of domestic, commercial and display situations.

Having half the weight and being more cost effective than painted glass is a great start – but Akril has so much more going for it.

Its ready availability and ease of installation reduces lead times and delays. It has higher heat distortion than conventional polymers (up to 100° Celsius) which means it has more applications. And what's more, scratches can be polished out.

That's brilliant.

In so many ways, 'brilliant' is the only word that can sum up Akril's great qualities so completely. From the lustre of its surface to the depth of its colour.

Brilliant!

From its versatility and durability, to its extraordinary practicality on site.

Now, that's truly brilliant.

Akril Kitchen Splashbacks

Induction | Electric | Ceramic Cooktops

Akril is used directly behind electric and induction cooktops, reducing time and hassles associated with colour back glass.

Akril's engineered polymer is durable and repairable at the same time.

That's brilliant.

Note: Warranty will be void if Akрил comes into direct contact with cooking apparatus and not installed as per manufacturers specification. Please refer to website for full installation manual and warranty.

Gas Cooktops

Akрил is used behind gas cooktops when used in conjunction with non combustible materials such as glass, tiles or stainless steel.

Akрил requires a minimum 150mm up stand behind the gas cooktop to comply with Australian standards, which allows Akрил to run above the 150mm up stand giving a seamless finish. Alternatively stainless steel, glass or tiles can run all the way to the rangehood.

That's brilliant.

Note: Warranty will be void if Akрил comes into direct contact with cooking apparatus and not installed as per manufacturers specification. Please refer to website for full installation manual and warranty.

Brilliant Installation

With no special tools required, Akril engineered polymer is easily installed by any tradesman. Simply cut to size and adhere Akril with a clear neutral cure silicone.

Durable, versatile, flexible and workable are the qualities that makes Akril's engineered polymer stand alone in a variety of domestic and commercial applications.

Brilliant!

Features at a glance

- Environmentally friendly – recyclable/ lower energy than glass to produce
- Can be colour-matched to suit (depending on project scale)
- "Good Environmental Choice of Australia" approval
- Available off-the-shelf in designer colours
- Lighter, more cost-effective than painted glass
- Higher heat distortion (up to 100° Celsius)
- Adhere with a clear neutral cure silicone
- 25 times more impact resistant than glass
- Available in Frost and Gloss
- Durable – abrasion resistant
- Scratches can be polished out
- Easy to work – easy to install
- 10-year UV warranty
- Unique, high-tech polymer
- Builders have on-site control
- Available in various sizes
- No grout to clean
